

HOW TO BREW

AFRICAN MIST & TROPIC KOOL

1. Remove mesh filter and fill the jug with 1L of room temp or cold water
2. Coarsely grind 100g of African Mist/Tropic Kool and pour into the mesh filter, then insert back into the jug
3. Pour another 200mls of water on top of the ground coffee
4. Stir well, ensuring all coffee grounds are saturated
5. Leave to steep for 12-15 hours either in the fridge or at room temp based on personal flavour preference
6. After desired brewing time, remove mesh filter and coffee grounds from the jug – discard and hand wash thoroughly
7. Store in fridge for up to 10 days
8. Serve straight up, over ice, or with your milk of choice
